FAIZA ZAFAR

React Native Developer | Mobile Engineer | AI-Augmented Development
faiza99826@gmail.com | 03232723789 | Karachi, Pakistan | linkedin.com/in/faiza-zafar-3b8a521b2

PROFESSIONAL SUMMARY

Results-driven React Native Developer with 4.5+ years of experience building scalable, cross-platform mobile applications for iOS and Android. Proven track record delivering award-winning, production apps across healthcare, fitness, tourism and e-commerce — including an app recognized as Best Nutrition Mobile App at the 10th Annual MedTech Breakthrough Awards. Skilled in performance optimization, mobile security hardening, RESTful API integration, payment gateway implementation and agile collaboration. Early adopter of AI-powered development tools, using Cursor AI and Claude with structured project context and task-level documentation to accelerate delivery and improve code quality.

CORE COMPETENCIES

React Native | React.js | TypeScript | JavaScript (ES6+) | Redux / RTK | Redux Saga
Cross-Platform Mobile Development (iOS & Android) | Performance Optimization
REST API Integration | Stripe Payments | Mobile Security | Code Obfuscation | Jailbreak/Root Detection
AI-Augmented Development (Cursor AI, Claude) | Jest | Agile/Scrum | WBS | Git | Jira | Postman

PROFESSIONAL EXPERIENCE

Software Engineer
June 2025 – Present
Think Digitally

- Retrofitted role-based access (Patient, Caregiver, HCP) and timezone-aware medication scheduling into a production healthcare app mid-development within a ~3-week window, enabling caregivers to manage multiple patients across different time zones with accurate local or home-timezone reminders.
- Implemented mobile security hardening for a healthcare application: integrated code obfuscation and jailbreak/root device detection to protect sensitive PHI (Protected Health Information) and support regulatory compliance.
- Leverage Cursor AI and Claude as AI coding assistants — establishing project-level context rules and writing task-specific markdown documentation for each feature — to accelerate development and perform faster, more accurate code reviews, reducing development cycles by approximately 30%.
- Develop and maintain production-grade React Native mobile applications for iOS and Android, building complex role-based user flows and reusable custom UI components.
- Integrated RESTful APIs for real-time data tracking, push notifications, and treatment-plan reminders.
- Mentor a junior developer through code reviews, pair programming, and technical guidance; contribute to architecture and library decisions alongside the team lead.
- Participate in sprint planning and task estimations in an Agile/Scrum environment.

React Native Developer
December 2023 – May 2025
TekRevol

- Diagnosed and resolved a scroll performance issue in a 150+ item height-selector component by replacing FlatList with FlashList, eliminating item flickering and delivering smooth scrolling on a core onboarding screen.
- Customized a third-party height-selector library by modifying its source code to match approved UI specifications, avoiding a full custom rebuild while preserving design fidelity.
- Developed alpha and beta versions of cross-platform mobile apps as a mid-level React Native developer, building fully customized UIs with pixel-perfect fidelity to design specifications.
- Integrated Stripe payment gateway supporting monthly, quarterly and yearly subscription models, ensuring PCI-compliant payment flows.
- Delivered dark mode, RTL localization (Arabic) and performance optimization for a fitness platform serving Arabic-speaking users.
- Consistently completed all assigned sprints on schedule; contributed to WBS creation and cross-team API alignment discussions.

Junior Software Engineer
January 2022 – December 2023
Technyx Systems

- Contributed to React Native mobile and React web projects across UAE government and tourism sectors, including MOFAIC, ADIBF and Visit Abu Dhabi (VAD).
- Developed form submission modules with validation logic, bug fixes and smoke testing; gained hands-on experience with Redux Saga and agile sprint workflows.

Project IT Trainee (Intern) *September 2021 – December 2021*
HBL – Habib Bank Limited

- Completed a structured IT trainee program at one of Pakistan's largest financial institutions, gaining exposure to enterprise software development practices and financial technology systems.

KEY PROJECTS

Cycle Vita PKU — Best Nutrition Mobile App, MedTech Breakthrough Awards | *Healthcare · React Native* | *June 2025 – Present* | App Store Google Play

- Recognized as Best Nutrition Mobile App at the 10th Annual MedTech Breakthrough Awards for AI-powered diet management supporting the PKU (phenylketonuria) community.
- Retrofitted role-based access (Patient, Caregiver, HCP) and timezone-aware medication scheduling mid-development within a ~3-week window.
- Implemented end-to-end mobile security including code obfuscation and jailbreak/root device detection to protect sensitive medical data.
- Built bilingual support (English/Spanish) and dark/light theme modes to improve accessibility and user experience.
- Delivered AI-assisted meal logging via in-app scanning, lab result tracking, medication reminders and personalized treatment plans serving 1,000+ active users.

Tamreeni – Fitness Platform | *Health & Fitness · React Native* | *June 2024 – May 2025* | App Store

- Diagnosed and resolved a scroll performance issue in a 150+ item list component by replacing FlatList with FlashList, eliminating flickering and delivering smooth scrolling.
- Customized a third-party UI library to match approved design specifications without a full rebuild.
- Delivered dark mode, full RTL localization and Stripe subscription management (monthly, quarterly, annual) for a fitness platform serving Arabic-speaking users, reaching 5,000+ downloads.
- Assisted junior developers and ensured consistent API integration and UI/UX alignment across the team.

Present App (iOS) | *E-Commerce · React Native* | *February 2024 – May 2024* | App Store

- Owned complete feature development from component architecture through App Store release for a gift-purchasing iOS application enabling parents to create child profiles and send curated gifts.

Visit Abu Dhabi (VAD) | *Tourism · React* | *June 2023 – December 2023* | visitabudhabi.ae

- Refactored legacy components and developed new modules for a high-traffic Abu Dhabi tourism website using Sitecore JSS architecture with React.

ADIBF (Abu Dhabi International Book Fair) | *Government · React Native* | *January 2023 – June 2023* | Google Play

- Developed ticket booking forms for multiple visitor types and implemented state management with Redux Saga for the official ADIBF event app.

MOFAIC (UAE Ministry of Foreign Affairs) | *Government · React Native* | *January 2022 – December 2022* | Google Play

- Built form submission flows with validation, performed bug fixes and smoke testing for a government application serving UAE nationals and non-nationals, reaching 500k+ downloads on Google Play

Sleep Music by Sleep Sounds | *Health & Fitness · iOS (React Native)* | App Store

- Contributed to an iOS sleep and relaxation app featuring ambient sound mixing, meditation audio and sleep timers, rated 4.9 on the App Store.

EDUCATION

M.S. Computer Science — GPA 3.52 / 4.00 *2022 – 2024*
NED University of Engineering & Technology

B.S. Computer Science — GPA 3.42 / 4.00 | 7th Academic Position *2017 – 2021*
Usman Institute of Technology (NED Affiliated)

ACHIEVEMENTS & RECOGNITION

- Best Nutrition Mobile App — Cycle Vita PKU was named winner at the 10th Annual MedTech Breakthrough Awards.
- 1st Place — Code Girls Competition (Code Fest): Won a mobile app development competition, receiving a cash prize and recognition among top female developers in Pakistan (October 2022).
- 7th Academic Position in Bachelor's — Ranked among top graduates.
